

HIGH POTENCY EGF REPAIRING CREAM EPIDERMAL GROWTH FACTOR WITH CERAMIDE

Features :

High Potency EGF Repairing Cream is a skin repair and anti aging treatment based on epidermal growth factor, ceramide and peptide. It stimulates cell communication and epidermal regeneration, then repairs the age related skin damage and enhances wound healing. Shea butter has anti-inflammatory and healing properties to protect skin from climate, pollutant and sun damages. This cream manifestly minimizes the appearance of scars and prevents wrinkles.

Active Ingredients : Butyrospermum Parkii (Shea Butter), C12-15 Alkyl Benzoate/Tribehenin/Ceramide NG/PEG-10 Phytosterol/Palmitoyl Hexapeptide-12 (Dermaxyl™), Recombinant Human Epidermal Growth Factor(-rh-EGF).

Directions : Apply on the cleansed and toned skin. Use twice daily.

Skin Types : All skin types.
